A New Concept In Carpet & Upholstery Care

December 26, 1999

We have been using Pow-R-Pak for years now and it is our main chemical for carpet prespray, upholstery and bonnet cleaning. With the added advantage of the great smelling orange fragrance, we are able to lightly deodorize at the same time. It is also much more economical than other chemicals I have used in the past due to it's low dilution ratio. It's really a great product.
