To whom it may concern:

Our company has been using Power Pak prespray for about two years now. Initially, we kept a stock of various other chemicals on the truck. But experience proved that PowerPak did just as good of a job (if not better) on all types of carpet and upholstery. The simplicity of having one prespray that is extremely safe and very effective has made things much easier in the field. Our clients love the fresh scent and the outstanding results.

Sincerely,

David Fontz
