

December 12, 1999

Getting started with Pow-R-Pak was easy because a good friend in the industry told me I needed to try it, and coming from him I knew that I must. I was surprised to hear that the pH level was at 6.6 on the acid side, and thought it may not perform as well as I was told. However, after the first use I was amazed. Not only did it clean some of the dirtiest carpet out there, it out cleaned a whole list of products that we have used for years. The reaction from my customers has been great, they love the smell and they all tell me how we have taken out spots that other cleaners could not. I now have more room on my truck, with Pow-R-Pak I do not need to have 5 or 6 different chemicals on my truck. I would recommend this product to anyone. Pow-R-Pak's ability to be used as a spotter or general cleaner is also a big plus, and once again our customers love it. Enough cannot be said about this product. It still amazes me even after 1 and a half years of using it. Whether it is used straight or mixed with water the uses are endless. Just try it once and you will not go back to what you use now!!!

Sincerely,  
Jim & Margaret Daniels
